FFA ELECTRONIC REPORTING AND ELECTRONIC MONITORING COORDINATOR – LONG TERM POSITION FOR 18 MONTHS

Title

FFA ERandEM COORDINATOR - TO ADVISE FFA ON ELECTRONIC REPORTING AND ELECTRONIC MONITORING AND OVERSEE THE IMPLEMENTATION OF THE REGIONAL LONGLINE FISHERIES ELECTRONIC MONITORING POLICY

Background

About the Pacific Islands Forum Fisheries Agency

The Pacific Islands Forum Fisheries Agency (FFA) was established by Forum Leaders in 1979 to strengthen the national capacity and regional solidarity of Forum member countries in the sustainable management and development of their offshore fisheries resources. Tuna fisheries make a significant contribution to many FFA members' economies and are an important source of revenue for government and export earnings. The WCPO tuna fishery is one of the largest in the world, catching over two million tonnes annually and is worth over 3USD billion a year. In addition, the four main target tuna stocks in the region are currently considered to be at sustainable levels. The Agency is responsible for assisting its 17 members to coordinate sustainable tuna fishery management policies in their exclusive economic zone and for promoting the development of their tuna fishery arrangements.

FFA's Role for its Members

FFA consists of the Forum Fisheries Committee (FFC) of officials and FFC Ministerial Meeting which are its governing bodies, and a Secretariat which is based in Honiara, Solomon Islands. The FFA Secretariat provides advice, technical assistance and other services to Members at the national, sub-regional and regional level. The Secretariat is organised into four divisions: Fisheries Management, Fisheries Development, Fisheries Operation and Corporate Services.

The Vision of the members of the FFA is that "Our people enjoying the greatest possible social and economic benefits from the sustainable use of offshore fisheries resources".

Its Mission is "Empowering FFA Members to take collective and national action for the sustainable use of offshore fisheries resources".

Electronic Reporting and Electronic Monitoring

Electronic Reporting and Electronic Monitoring work sits across the Fisheries Operations and Fisheries Management Divisions of FFA. Fisheries are becoming increasingly dependent upon electronic solutions for both management and compliance purposes. These solutions have continued to evolve over time and many of our members are using electronic tools to capture and transmit fishery data through electronic reporting (ER) and/or electronic monitoring (EM). Examples

of ER include electronic entry and transmission of catch logsheets, observer reports and offload records. E-Reporting provides the opportunity for real time reporting of critical information through satellite transmission or mobile networks, as well as to store data for download at the end of a trip. Whilst ER may be more advanced amongst FFA members, EM, apart from VMS, is still either being trialed or at an early stage of implementation by some. Status of implementation of both ER and EM in the region, as at mid-2020, can be found at <https://www.wcpfc.int/node/46590>

At FFC114 (June 2020), FFA members reaffirmed their commitment to progressively adopt electronic reporting for fishing vessels operating within their exclusive economic zones and the high seas with a view to achieving 100% adoption by 2022, noting the need to cater for special circumstances of small domestic vessels operating solely within EEZs. FFC114 also adopted the [Regional Longline Fisheries Electronic Monitoring Policy](#), as a guide for members in support of the development of their national EM programmes. Further, FFC114 tasked the Secretariat, in collaboration with SPC and PNAO, to develop a fully costed work plan to progress implementation of the EM Policy. A draft workplan is in place which will require active review and monitoring in order to progress the tasks required therein.

In the WCPFC context, an ERandEM Working Group (WG) has been in place since 2015 and has held four meetings to-date. Whilst the first two meetings focussed on ER, the third and fourth shifted focus to EM. The current discussion is on a draft Conservation and Management Measure (CMM) for EM and the development of EM standards. More information can be found on WCPFC ERandEMWG at <https://www.wcpfc.int/erandem-iwg>

The Pacific Community (SPC) actively supports members with ER and EM including through the rollout of ER tools, EM development and facilitating regional workshops. Further information is available here - [E-Reporting & E-Monitoring \(spc.int\)](#).
